

# QUANTUM

All new 5-13 flip-up helmet

*\*Also available as PAPP solution*

UNIVERSAL / [universalpe.co.uk](http://universalpe.co.uk)

The Quantum helmet benefits the areas of welding preparation and improves grinding functionality. It does this by allowing a flip mechanism, which houses a ADF filter, to be lifted exposing a larger viewing/grinding visor window.

This allows the welder to remain fully protected with having to lift the entire helmet shell up exposing the face. This helmet is also available with a PAPP and hard hat system.
