

# AERO FLOW

## SUB-ZERO AIR COOLING REGULATOR

### Keep cool, stay protected

The Sub-Zero Air Compressor draws in hot ambient air and passes it through a specialized water-oil separator, where the hot and cold air streams are isolated. Cold air will then be continuously delivered to your connected headtop or cooling vest, ensuring a lasting cooling relief in high-temperature work environments.

Say goodbye to the hassle of traditional ice cooling methods. With a simple switch, enjoy instant cooling at your fingertip.

Aero Flow Sub-Zero  
RP268

### Specifications

Size	173.5 x 112 x 55mm	Compressed air flow	260 - 400 L/min
Weight	330g	Cooled air flow	190 - 290 L/min
Input pressure range	35 - 45 PSI	Maximum cooling value	-19°C

# AERO FLOW AIR REGULATOR

### Clean air for comfortable breathing

The Aero Flow Air Regulator transforms compressed air into a gentle and smooth airflow, delivering it directly to the user. Depending on your specific needs, the airflow can be infinitely adjusted from 170 to 305 L/min. With its lightweight and compact design, it ensures comfortable extended use and is compatible with welding helmets and grinding face shields.

### Specifications

Inlet pressure	3 - 8 Pressure range (kg/cm <sup>2</sup> )
Warning pressure	3 Warning whistle pressure (kg/cm <sup>2</sup> )
Airflow per min	170 - 305 L/min
