

RP227 QUANTUM AIR GAS FILTER (A2) (copy)

DESCRIPTION

• A2 filter captures organic, inorganic and acid gases and vapours. To be used in combination with a P3 filter for the Quantum PAPR unit. Universal Gas Filter A2, (RP227) is our A filter designed for use with Quantum Powered Air Respirator. Protection from gases and vapours. Gas filter must always be used together with the particle filter (RP154) and we recommend using the heavy-duty battery (AC436). Gas filter should be replaced according to your workplace requirements. It is not recommended to wait until odours can be detected.
