

**DESCRIPTION**

• The Aero Flow Air Regulator transforms compressed air into a gentle and smooth airflow, delivering it directly to the user. Depending on your specific needs, the airflow can be infinitely adjusted from 170 to 305 L/min. With its lightweight and compact design, it ensures comfortable extended use and is compatible with welding helmets and grinding face shields.

**Specifications/Technical Data**

|                  |  |
|------------------|--|
| Inlet Pressure   | 3- 8 Pressure range (kg/cm <sup>2</sup> )        |
| Warning Pressure | 3 Warning whistle pressure (kg/cm <sup>2</sup> ) |
| Airflow Per Min  | 170- 305 L/min                                   |
